

Social Media Policy

Canadian Logger Sports Association (CANLOG) acknowledges the benefits that social media has in everyday life. We can engage with competitors across the globe, share information instantly and grow knowledge about the sport. While those are all positives, social media has been used in other ways that we don't want to encourage and in extreme circumstances, condemn. CANLOG developed a social media policy, to ensure our values can be reflected accurately.

This policy applies to all social media channels. Whether it is with posting, commenting, reviewing, and sharing.

This policy also applies to:

- Show centers
- Members
- General public

Guidelines

Anything uploaded or posted on a social media platform is permanent and public. All posts need to be related to logger sports and CANLOG. We will not tolerate:

- Abusive, threatening or harassing content of any kind
- Confidential information
- Sexism, racism, classism, homophobia
- Inappropriate language
- Politically charged posts
- Not limited to these points

We encourage:

- Any information related to logger sports (gear/travel/show information & updates etc)
- Experiences (achievements, results, etc) in positive ways
- Support of other members (encouragement, training tips, etc)

Anything posted that is not related to loggers' sports nor doesn't meet our guidelines will be removed. We will reach out to the individual to inform them that their post goes against our policy and if appropriate will allow them to create a new post that aligns with our values

Branding

CANLOG can not be used in any way that goes against our values and soils our reputation. Anything involving CANLOG must have prior consent before use (our logo, images, events). Please contact our current president to receive approval on the matter before posting.
